MOVEMENT **DOWNWARD**

Saturday's Late Rally Had Little Effect on Opening.

RELAPSED INTO DULLNESS

Money Situation Continues to Weigh Upon the Market-Ruling Rate for Call Money Was 3 3-4 per cent. and Time Money Scarce.

(By Associated Prost.)

NEW YORK, March 2.-The closing rally in stocks on Saturday had some slight influence upon the opening dealings to-day, but the advance was insignificant and the market soon relapsed into dull-ness and neglect and a slow downward movement. The decrease in net earnings for January reported by St. Paul was an unfavorable influence, although it was sought to explain it by the high price for fuel, which had to be paid. Amalgamated Copper showed some strength, owing to the further advance in the metaboth here and in London, and Penhsulvania made some resistance to the dipression. Late in the day again the engagement of the dispression. Late in the day again the engagement of the dispression of the dispressio

howing the continued drain of times here.

A contraction of bank reserves is normal to this season and is expected to go further. But surplus reserves of \$5,53,590 of the associated banks, disclosed by Satarday's bank statement, is the lowest for this season since 1890. Last week's insignificant contract in loans leaves that item of the clearing-house banks still practically at the highest record in their practically at the highest record in their history. It is estimated also that sequrities lately authorized, but rather more remotely in prospect, run up to over \$50,000.000.

ittes lately huntrofized, but the solver remotely in prospect, run up to over \$200,000,000.

Bales of bonds for February this year in the stock market decreased nearly \$20,000,000 in par value or over 22 per cent. from the sales of February of last year. These are the conditions that keep speculation from the stock market and discourage investment demand.

Bonds were dull and inclined to be easy total sales, par. value, \$1,850,000. United States bonds were all unchanged on the test cell.

The total sales of stocks for the day ware 485 000 shares. The total sales of stocks for the day were 459,000 shares.

THE EDITORS' VIEWS

What the New York Evening Papers Think of the Situation.

Think of the Situation.

(Special to The Times-Dispatch.)

NEW YORK, March 2.—Evening Post

378: Three causes co-operated in bringing about to-duy's decline of prices—the
continued tightening of the money market, and some decreased January railwayearnings. Under this triple influence the
slock market after a fair show of steadliness
during the first two hours yielded slowly
with intervals of duliness and brief activtity, and in the long run fell to a level
fractionaly under last week's clossing.
Low level was reached before the close,
after which came a slight recovery.

Changes for the day were highly irregu
The weakest points were St. Paul,
setropolitan, Southern Pacific and Atchitson, in which the loss was a point or
thereabouts. Advices from Washington,
regarding the Aldrich bill, were sufficiently bewildering. They suggested the
multiplicity of quarreisome cooks, which
not only spoils the broth, but upsets the
couldron.

The Mail and Express says: Financial

mot only spoils the broth, but upsets the couldron.

The Mall and Express says: Financial legislation at Washington was the pivot upon which stock market sentiment turned by the couldron. At first there was a disposition to ado, at first there was a disposition to ado, an optimistic view of the chances of the Aldrich bill, or a compromise measure; then the situation became was no evidence and the chances of the Aldrich bill, or a compromise measure; then the situation became was no difficulty in forcing the chances of the Aldrich bill, or a compromise measure; then the situation became was no difficulty in forcing the shorts to cover, and the movement disposition of the Aldrich bill, or a compromise measure; when the short time same the conclusion that all measures would fail in the short time was no difficulty in forcing the shorts to cover, and the movement disposition that all measures would fail in the short time was no evidence and any short interest in Material the way of any short interest in Material the way that the street did nity in the chance of the common that all measures would fail in the short time was no evidence of any short interest in Material the street did nity appeals to capy. Shorts to cover, and the movement did not seem to have any other significance.

NEW YORK CENTRAL:

Shorts covered here and abroad, and ast the cable of about 10,000 shages. Shorts covered here and abroad, and

being accelerated by demonstrations on the part of the bearish trading element.

The Commercial-Advertiser says: The same influences continued to work against to-day's market as depressed the speculation last week. The banks started the new clearing-house week with a loss of \$2,135,000 to the sub-Treasury, foreshadowing, of course, a further heavy loss by next Saturday. Borrowers of money on time were still able to get their wants supplied at 5 per cent, for all periods, but call money reflexed the prevailing tendency by holding firm at \$3, per cent, and above all day. The reports from Washington as to the chances of the Aldrich bill were extremely conflicting, but they expressed more doubt than the similar advices of Friday and Saturday. On the whole Wall Street sentiment seemed to be preparing itself for bad news from this quarter, and these preparations were the principal factor undoubtedly in the movement of prices. The downward tendency did not really become very distinct before the afternoon. One or two individual stocks, Copper and Manhattan particularly, were bid up sharply, and there was some early strength also in St. Paul. Atchison, Pennsylvania and one or two others of the active stocks. But the advance made little headway What buying thore was at the outset soon exhausted itself, and early in the afternoon the general market.

advance of the motal in London and a hardening tendency in the copper market here. The copper trade interests still seem to be on the long side of Amaignated, although it is noticeable that the Standard Oli people are not saying much.

PENNSYLVANIA FIRM:
Pennsylvania showed a firm tone and
apparently reflected the views of the outor-lown investors on the annual report.

WABASH STRIKE:
The settlement of the wage question had some influence in strengthening Wabash, but there seemed to be some rather good selling. The belief that the buying by the Gould interest to complete absolute control was over and made traders rather bearish.

St Paul Declined:
St. Paul showed a declining tendency after developing a little early strength. Some of the stock bought on Saturday with an eye to its effect on the general market was thrown over. It was not believed that special action would be taken on the authorized new issue, but there was still people who thought that some announcement would be made at the dividend meeting on Thursday.

THE TRACTIONS:

The pressure in the Traction stocks, especially Brooklyn and Metropolitan, appeared to come from political sources. The latter did not act as if the short in terest were so considerable as had been stated. Although there was no deposition, Manhattan seemed to have store of any short interest in Metropolitan, Manhattan seemed to have store overside. Specialists says that the street did not realize how much or remained the taken away for ermajent investment. There was no difficulty in forcing the shorts to cover, and the movement did not seem to have any other significance.
